EXPERIENCE

Budgety
ReactJs, Redux, Styled Components, Firebase

A react app where you can add your incomes and expenses
to better manage your money. I've used the Firebase SKD
for registering and authenticating the user and firestore for saving the user data.

MyAlb
ReactJs, Redux, Firebase

The user can search for any pictures, for this I've used the unspalsh API. They also can save their favorites if they've registerd via Facbook auth or by using their email.

Weather App
HTML, JavaScript, SCSS

This application was built by using the MVC pattern. The user can look at the forecast by searching for a city or based on the location they are at.

Snake
HTML, CSS, JavaScript

It is a simple snake game.
For the graphic I've used HTML canvas, and for the logic of the game JavaScipt.
